

Upgraded power and performance.

Take musical performance to the next level with this instant upgrade for new Naim 200 Series sources and pre-amplifiers, including the NSC 222 streaming pre-amplifier. It disables the internal power supply - immediately reducing the noise floor further still - and provides a superior transformer and cleaner power. Connect multiple NPX 300 upgrades within the same set-up for the ultimate musical experience.

### Key points

- **Instant power supply** upgrade for Naim 200 Series sources and pre-amplifiers.
- **Scalable:** add an NPX-300 power supply to any or all the above.
- **Provides a superior and cleaner power supply.**
- **Superlative build quality** and beautifully designed in the UK.
- **0.5W standby power**  
Using two internal power supplies; one is a high quality audiophile linear type, based on a large toroidal transformer. The other is a highly efficient SMPSU for 0.5W power consumption in standby during standby mode.
- **Legacy mode for compatible legacy products** such as the NDX2, NAC 272 (note legacy cable required).

### Specifications

Type	<b>Power supply</b>
Standby Power Consumption	<0.5W
Power Supply Output	Type 3, Type 4
Other Connectors	Micro USB (update only)
Naim Logo	White illuminated
Mains Supply	115V or 230V, 50/60Hz
Dimensions (HxWxD)	3 <sup>5</sup> / <sub>8</sub> x17x12 <sup>1</sup> / <sub>2</sub> " (9.15 x 43.2 x 31.75cm)
Weight	31.75lbs (14.4kg)
